Many individuals are faced with the challenge of preserving years of accumulated photographs and slides. At SAF Imaging, we help make the valuable memories stored in these photos easily accessible by a process known as "Photo Imaging" - the conversion of photographs to electronic images via a computer system and scanner. When these valuable memories are converted from traditional paper based media into electronic media, the resulting improvements in accessibility, preservation, and sharing these memories among family and friends can be quite dramatic.

SAF Imaging provides high quality, cost effective photo scanning of any size photo (up to 12" x 18"). SAF Imaging can convert virtually any photograph or slide you have accumulated over the years.

This service is performed at our secure facility. We will scan and transfer your photos into an electronic format and deliver it to you on CD, DVD, USB Flash drive, or other electronic media.

Contact us today to begin the process of creating a lasting impression of your most cherished memories!
